

Welcome to Aichi Prefectural Tsushima Senior High School

Principal **KAWATE Fumio**

Our school was established as the Third Secondary School in 1900(Meiji the 33rd). Later, in 1948(Showa the 23rd), it merged with Tsushima Girls' High School, which was established in 1915(Taisho the 4th). As a result, our Tsushima High School was newly opened. In 2020, our school celebrated its 120th Anniversary.

Thus, its roots go back more than 120 years. It has produced many great talents in a broad range of fields. Also, our educational environment has been improved in earthquake resistance and air-conditioning in recent years. Besides, in the southwest of our school, we have been presented with a Special Study Hall named "Kougakukan," by our Alumni Association. The New Hall is connected with our predecessors' Old Auditorium. The area is the splendid spot where Tradition and Innovation meet.

Our Tsushima High has two schools, full-time and part-time. The full-time school has both a comprehensive course and an international understanding course. The latter course began in 2007(Heisei the 19th).

We are devoted to the realization of the next three aims:

- 1 To push forward with our School Motto "Knowledge, Humanity, and Courage"
- 2 To aim at the students' respect for social norms, their academic development, and their better future course in life.
- 3 To promote the education in international understanding and in math and the natural sciences

Our School Motto is, as mentioned above, "Knowledge, Humanity, and Courage." With rich greenery and vast school land area, we keep a good tradition of the values under which this school was originally founded.

We have 33 classes from Monday to Friday, with 6 or 7 periods of 50 minutes each. And we have supplementary classes before and after ordinary classes. Moreover, in long-term vacations or on Saturdays, special study programs are organized. At the same time, we put a lot of energy into club activities and school events. Our school is the superb stage where Pen and Sword meet.

In this way, we encourage our students to make a well-balanced improvement of mind and body. We also encourage our students to build up a good personality through a diverse range of extracurricular activities. We expect our students to foster their spirits of independence and self-reliance and participate in school events eagerly. Most importantly, Tsushima High is the significant school where Students and Teachers meet the expectations of the parents and citizens.

Our sales points:

- 1 Most of our students pass their entrance exams or decide which career to pursue directly on graduation from our school.
- 2 Most of our students (including the track teams which have been given the chance to participate in the Interscholastic Athletic Meet) dedicate themselves to club activities.
- 3 The students in our international understanding course attend an English summer camp and spend thirteen days brushing up their English in New Zealand.
- 4 Our school established Sister School relationships with Matthayom Watsuttharam School in Bangkok in 2018 and has continued good bridges of friendship since then.
